

LIGHTWEIGHT PROTECTS

PGT® Eze-Breeze® is designed to make outdoor spaces more utilized places. These versatile and attractive enclosure products are easy to operate and give your outdoor living area that breezy, screened porch feeling, while providing protection from the elements.

A reputation you can count on...

Manufactured by PGT Industries for over 30 years, this unique, custom-designed product offers on-time delivery, no hassle installation and the backing of a solid company. We make it easy to protect your investment with our iron-clad, lifetime warranty on the aluminum frames and 10-year warranty on the vinyl, screen and moving parts.

PORCH AND PATIO ENCLOSURES

AFFORDABLE BEAUTIFIES

Your porch, patio, deck, gazebo, or pool is there for a reason. You love that touch of outdoor living but it seems that dust, rain and bugs spend more time there than you do. Reclaim your outdoor space and turn it into a beautiful multi-season space that attracts family and friends instead of nature's elements.

TRANSFORMS OUTDOOR LIVING

Built to last... Eze-Breeze enclosure products are constructed with durable aluminum frames that hold screen and vinyl glazed panels in place. **Lightweight...** The vinyl-glazed panels can be raised or lowered effortlessly. **Protection from the elements...** open the panels to enjoy the fresh air or close them to provide protection from the wind, rain, and dust while still enjoying the outdoors. **Affordable...** the rugged vinyl glazing has the transparency of glass without the cost or weight. **Strong, shatter-proof and flexible...** If accidentally pushed or distorted, it will return to its original shape within minutes. It's a product with a memory.

Beautifies... The clean lines and pleasing proportions complement any architecture or style of home. Improving your curb appeal has never been more affordable. **Perfect for existing porches...** Custom made to fit any space. **Or new construction...** It's easy to have fun designing an outdoor space that's just right.

VERTICAL FOUR-TRACK

Vertical Four-Track panels offer 75% ventilation. Just raise or lower three of the lightweight panels over the fourth to create that outdoor feel.

Or remove and store the panels, leaving the screens in place, for 100% airflow. Our vertical design also includes tilt-in vents that make operating and cleaning... well... a breeze.

For openings too small for operable units we offer a unique Removable Vent Fixed Lite that matches our Vertical Four-Track panels. The factory installed lift tabs make it easy to remove and store the panel for even more ventilation. Our Standard and Heavy Duty Lip Frame is also an ideal alternative.

HORIZONTAL SIDE SLIDER

Horizontal Side Slider panels offer 50% ventilation. With just one finger, full length panels slide left or right on corrosion resistant, neoprene rollers.

Like Vertical Four-Tracks, panels can be easily removed and stored, leaving screens in place, for 100% airflow.

For small openings we also offer a Heavy Duty Lip Frame. Designed to match the look of the horizontal sliding panel it is also an ideal companion to the vertical units. A trapezoid shape is also available to help fill the ends of gabled roofs.

CABANA DOOR

Finish your porch enclosure project with this heavy duty aluminum door complemented with our Eze-Breeze panels. There is no exposed weather-strip or unsightly notches so when you open your door to invited guests, they only see the door and your new space.
